

Three dates decide what a test can prove

When the filing appeared, where the model's knowledge ends, and when the verdict was written

WITH HINDSIGHT

The model may already know how the story ended.

AFTER THE CUTOFF

The filing follows the stated cutoff; the verdict still came late.

WRITTEN IN ADVANCE

The verdict exists before anything it predicts. Only this is a forecast.

Event order is schematic; spacing is not elapsed time. Source: the evaluation protocols.
